**WHEEL**  
for MAC OS X and Windows XP

# Take Control of the

## Introducing Wheel

Annual membership includes:

### **SpyMac Mail Pro - 3 GB IMAP E-Mail with Virus and SPAM Protection**

Included with Wheel is a first-class E-mail account that offers enough storage for more than one million messages. Mail utilizes leading edge virus and SPAM protection, ensuring that your inbox contains only messages that belong there. Web-mail (both Mac and PC-tailored versions available), POP and IMAP access is included.

### **WheelDrive - Fast online hard disk for Mac and PC**

Access your online hard disk anywhere, anytime, online or offline, from Mac OS X and Windows XP. WheelDrive includes 250 MB of storage that can be used for web page hosting, file sharing, or remote backups. Sharing files between platforms has never been easier.

### **WheelGuard - Backup software to keep your critical data safe**

WheelGuard, for both Mac OS X and Windows XP operating systems, offers robust protection for your personal files. Backup your important data locally, on CDs and DVDs\*, or even to external hard disks and iPods. WheelGuard is also fully integrated with WheelDrive, making remote Internet backups hassle-free and simple. When it comes time to restore your data, a single click will intelligently place the files back where they belong. WheelGuard supports customizable backup sets and includes presets for the most popular Mac and PC applications. (\*Some restrictions may apply)

### **iCal**

With Wheel and iCal, members can publish their calendars and schedules online to share with friends, family and colleagues. Wheel also allows members to password protect sensitive calendars, keeping information safe and private.

### **Blog**

A Blog is an online journal that makes it easy to communicate with friends, family or the entire Internet. Requires no web page building knowledge - simply write an entry and publish with a single click. BlogSpinner, a desktop application for both Mac OS X and Windows is currently under development. When released, BlogSpinner will allow members to add new blog entries straight from their desktop.

### **Extras**

From discounts to free software, Wheel members receive valuable access to special deals and offers.

Wheel ships on a single CD that works on both Mac OS X (10.3 and above) and Windows XP, putting you in control regardless of what computer you use to access the Internet. New software and services are being developed for Wheel that add even more value to the package. Just around the corner are added features such as desktop blogging and advanced synching technology. These features will be offered to current members free of charge.
